OSTEOSTRIP™

OSTEOSTRIP™ is a malleable and compressive graft material that also exhibits osteoconductive and osteoinductive properties. These characteristics make it a powerful tool for bone grafting in spinal fusions, foot and ankle, non-unions, and bone fractures. Use of the **OSTEOSTRIP™** enhances the biologic properties of allograft bone resulting in optimized fusions and improved structural integrity.

Product Characteristics and Benefits

- 100% cancellous bone
- Osteoinductive Properties
- Osteoconductive
- Osteogenic when used with BMA or BMAC
- Compressible handling properties
- Radiolucent
- Variety of dimensions available

Where We Get **OSTEOSTRIP™**

Stringent tissue donor screening, recovery, storage and shipping guidelines are followed to best preserve the allografts for their intended functions.

The GraftShield™ Advantage

- Sterile human allograft tissues
- Final package sterilization
- Proprietary cleansing processes
- Meets the exacting FDA regulations and AATB standards
